What We Do

inLogic is a leading provider of RFID fixed asset tracking software that enables organizations to save time, reduce operating costs, and improve asset visibility. Our software platform, RFTrack, significantly reduces the man-power required to physically track assets by automating fixed asset inventory audits, locating missing assets, improving asset utilization, and tracking the movement of assets in real-time to improve visibility.

What Makes Us Different

- Over 14 years of RFID experience
- Exclusive focus on fixed asset tracking software
- Mature product - currently version 7
 - Intuitive interface and processes
 - Features based on years of actual end-user feedback
- Web-based - no software to install on each PC
- Unlimited users - no per user software costs (On-Premise)
- Customizable:
 - Customers can add their own custom fields
 - Change system terminology
 - Develop custom reports
- Easily import/export data from other systems or spreadsheets
- Easy to implement (ready to use out of the box)
- Scalable enterprise solution on Microsoft .NET/SQL platform
- Maintenance and Support includes all version upgrades
- Our software simplifies asset tracking for end-user's
- Deployment options:
 - On-Premise - software installed on customer's server
 - On-Demand - hosted on our servers as a subscription
- Ability to import maps and floor plans
- Supports handheld and fixed RFID readers
- Supports passive and active RFID
